

About the Center for Study of Gene Structure and Function

- Supported by a major grant from the Research Centers in Minority Institutions Program of the National Center for Research Resources, an agency of the National Institutes of Health
.....
 - Established in 1985
.....
 - Comprised of 46 faculty researchers
.....
- Develops biomedical research scientists
.....
- Recruits outstanding faculty, postdoctoral fellows and graduate students
.....
- Increases the representation of minorities in biomedical research

Mission

- To develop and prepare the next generation of American Scientists, including minorities under-represented in the sciences
.....
- To recruit and equip outstanding faculty, including minorities
.....
- To develop and share core research facilities
.....
- To implement strategies for scientific networking
.....
- To build unique collaborations among biologists, chemists, biopsychologists, biophysicists and bioanthropologists
